The Board of Fund Commissioners authorized the fund office to solicit quotations for payroll auditing service; results will be prepared by the next meeting for the board to review and award a contract.

Asset Manager: The fund office sought price quotes for Asset Manager Services to provide investment and monthly reporting on terms investments in securities authorized by law and the fund's cash management plan. Executive Director reported two firms - TD Bank and Wilmington Trust - responded to all required services; TD Bank submitted fees of 5.5 basis point and Wilmington Trust 5 basis points based on a percentage of fixed income assets. The Board of Fund Commissioners accepted a recommendation to award a one-year contract to Wilmington Trust at an estimated cost not to exceed \$10,000; using the fund's cash balance as of December 31, 2016 fees will be approximately \$2,000 per year.

2017 Financial Disclosures: Board members should anticipate the online filing of the Financial Disclosure forms as both a NJCE Commissioner, as well as, any County-related positions that require filing. Re: Unmanned Aircraft ("Drones")

Liability coverage for Unmanned Aircraft, also known as "drones", as previously reported, is available within your Non-Owned Aircraft policy and your Casualty policy. Non-owned drones, those not owned by the NJCE insureds, would be covered under the Non-Owned Aircraft policy on a blanket basis. Owned drones, those owned by the NJCE insureds, would be covered under the Casualty policy. Additional information on operating the drones and the regulations can be found in the attached addendums.

AVAILABLE COVERAGE

Non-Owned Aircraft Policy

- ✓ Pilot of the aircraft must meet the requirements of the FAA
- ✓ Homebuilt aircraft and military aircraft are specifically excluded

Owned Aircraft (Casualty Policy)

- ✓ Coverage is only available in the first layer of excess casualty coverage with Brit
- ✓ The aircraft cannot be weaponized
- ✓ "Unmanned Aircraft": means an aircraft, either fixed-wing or rotary-wing, without a human pilot on board, weighing 10 pounds or less, controlled by computers in the aircraft or under the remote control of a pilot on the ground
 - Aircraft 10 pounds or less: must be underwritten
 - Aircraft over 10 pounds: must be underwritten and scheduled
- ✓ Minimum underwriting information required:
 - Year, make and model
 - Description
 - Date of purchase
 - Unit cost
 - Unit serial number
 - Payload, if any (i.e. cameras, etc.)
 - Intended use
 - Legal compliance (i.e. FAA registration)

The above description is a general discussion of the coverage and limits provided by the NJCE; however, the actual terms and conditions are defined in the policy document and all issues shall be decided based on the policy document. BULLETIN NJCE 17-01 ADDENDUM

First and foremost, we strongly recommend counsel review of the planned operations of the drone and the compliance requirements.

Following is the link to the full FAA Rule Part 107:

The following is a summary published by the FAA regarding its final rule on drones:

Summary of Small Unmanned Aircraft Rule (Part 107) – June 21, 2016

Operational Limitations:

- Unmanned aircraft must weigh less than 55 lbs. (25 kg).
- Visual line-of-sight (VLOS) only; the unmanned aircraft must remain within VLOS of the remote pilot in command and the person manipulating the flight controls of the small UAS. Alternatively, the unmanned aircraft must remain within VLOS of the visual observer.
- At all times the small unmanned aircraft must remain close enough to the remote pilot in command and the person manipulating the flight controls of the small UAS for those people to be capable of seeing the aircraft with vision unaided by any device other than corrective lenses.
- Small unmanned aircraft may not operate over any persons not directly participating in the operation, not under a covered structure, and not inside a covered stationary vehicle.
- Daylight-only operations, or civil twilight (30 minutes before official sunrise to 30 minutes after official sunset, local time) with appropriate anti-collision lighting.
- Must yield right of way to other aircraft.
- May use visual observer (VO) but not required.
- First-person view camera cannot satisfy "see-and-avoid" requirement but can be used as long as requirement is satisfied in other ways.
- Maximum groundspeed of 100 mph (87 knots).
- Maximum altitude of 400 feet above ground level (AGL) or, if higher than 400 feet AGL, remain within 400 feet of a structure.
- Minimum weather visibility of 3 miles from control station.
- Operations in Class B, C, D and E airspace are allowed with the required ATC permission.
- Operations in Class G airspace are allowed without ATC permission.
- No person may act as a remote pilot in command or VO for more than one unmanned aircraft operation at one time.
- No operations from a moving aircraft.
- No operations from a moving vehicle unless the operation is over a sparsely populated area.
- No careless or reckless operations.
- No carriage of hazardous materials.
- Requires preflight inspection by the remote pilot in command.
- A person may not operate a small unmanned aircraft if he or she knows or has reason to know of any physical or mental condition that would interfere with the safe operation of a small UAS.
- Foreign-registered small unmanned aircraft are allowed to operate under part 107 if they satisfy the requirements of part 375.
- External load operations are allowed if the object being carried by the unmanned aircraft is securely attached and does not adversely affect the flight characteristics or controllability of the aircraft.
- Transportation of property for compensation or hire allowed provided that:
 - The aircraft, including its attached systems, payload and cargo weigh less than 55 pounds total;
 - The flight is conducted within visual line of sight and not from a moving vehicle or aircraft; and
 - The flight occurs wholly within the bounds of a State and does not involve transport between (1) Hawaii and another place in Hawaii through airspace outside Hawaii; (2) the District of Columbia and another place in the District of Columbia; or (3) a territory or possession of the United States and another place in the same territory or possession.

 Most of the restrictions discussed above are waivable if the applicant demonstrates that his or her operation can safely be conducted under the terms of a certificate of waiver.

Summary of Small Unmanned Aircraft Rule (Part 107) (cont'd)

Remote Pilot in Command Certification and Responsibilities:

- Establishes a remote pilot in command position.
- A person operating a small UAS must either hold a remote pilot airman certificate with a small UAS rating or be under the direct supervision of a person who does hold a remote pilot certificate (remote pilot in command).
- To qualify for a remote pilot certificate, a person must:
 - Demonstrate aeronautical knowledge by either:
 - Passing an initial aeronautical knowledge test at an FAA-approved knowledge testing center; or
 - ➤ Hold a part 61 pilot certificate other than student pilot, complete a flight review within the previous 24 months, and complete a small UAS online training course provided by the FAA.
 - Be vetted by the Transportation Security Administration.
 - Be at least 16 years old.
- Part 61 pilot certificate holders may obtain a temporary remote pilot certificate immediately upon submission of their application for a permanent certificate. Other applicants will obtain a temporary remote pilot certificate upon successful completion of TSA security vetting. The FAA anticipates that it will be able to issue a temporary remote pilot certificate within 10 business days after receiving a completed remote pilot certificate application.
- Until international standards are developed, foreign-certificated UAS pilots will be required to obtain an FAA-issued remote pilot certificate with a small UAS rating.

A remote pilot in command must:

- Make available to the FAA, upon request, the small UAS for inspection or testing, and any associated documents/records required to be kept under the rule.
- Report to the FAA within 10 days of any operation that results in at least serious injury, loss of consciousness, or property damage of at least \$500.
- Conduct a preflight inspection, to include specific aircraft and control station systems checks, to ensure the small UAS is in a condition for safe operation.
- Ensure that the small unmanned aircraft complies with the existing registration requirements specified in § 91.203(a)(2).

A remote pilot in command may deviate from the requirements of this rule in response to an in-flight emergency.

Aircraft Requirements:

FAA airworthiness certification is not required. However, the remote pilot in command must conduct a
preflight check of the small UAS to ensure that it is in a condition for safe operation.

Model Aircraft:

- Part 107 does not apply to model aircraft that satisfy all of the criteria specified in section 336 of Public Law 112-95.
- The rule codifies the FAA's enforcement authority in part 101 by prohibiting model aircraft operators from endangering the safety of the NAS.

The following is a fact sheet published by the FAA regarding its final rule on drones:

Fact Sheet – Small Unmanned Aircraft Regulations (Part 107) June 21, 2016

The new rules for non-hobbyist small unmanned aircraft (UAS) operations – Part 107 of the Federal Aviation Regulations (http://www.faa.gov/uas/media/RIN_2120-AJ60_Clean_Signed.pdf) (PDF) – cover a broad spectrum of commercial uses for drones weighing less than 55 pounds. Here are the highlights of the new rule.

Operating Requirements

The small UAS operator manipulating the controls of a drone should always avoid manned aircraft and never operate in a careless or reckless manner. You must keep your drone within sight. Alternatively, if you use First Person View or similar technology, you must have a visual observer always keep your aircraft within unaided sight (for example, no binoculars). However, even if you use a visual observer, you must still keep your unmanned aircraft close enough to be able to see it if something unexpected happens. Neither you nor a visual observer can be responsible for more than one unmanned aircraft operation at a time.

You can fly during daylight or in twilight (30 minutes before official sunrise to 30 minutes after official sunset, local time) with appropriate anticollision lighting. Minimum weather visibility is three miles from your control station. The maximum allowable altitude is 400 feet above the ground, and higher if your drone remains within 400 feet of a structure. The maximum speed is 100 mph (87 knots).

You can't fly a small UAS over anyone who is not directly participating in the operation, not under a covered structure, or not inside a covered stationary vehicle. No operations from a moving vehicle are allowed unless you are flying over a sparsely populated area.

Operations in Class G airspace are allowed without air traffic control permission. Operations in Class B, C, D and E airspace need ATC approval. See Chapter 14 in the Pilot's Handbook http://www.faa.gov/regulations policies/handbooks manuals/aviation/pilot handbook/media/phak%20-20chapter%2014.pdf

You can carry an external load if it is securely attached and does not adversely affect the flight characteristics or controllability of the aircraft. You also may transport property for compensation or hire within state boundaries provided the drone – including its attached systems, payload and cargo – weighs less than 55 pounds total and you obey the other flight rules. (Some exceptions apply to Hawaii and the District of Columbia. These are spelled out in Part 107.)

You can request a waiver of most operational restrictions if you can show that your proposed operation can be conducted safely under a waiver. The FAA will make an online portal available to apply for such waivers.

Pilot Certification

To operate the controls of a small UAS under Part 107, you need a remote pilot airman certificate with a small UAS rating, or be under the direct supervision of a person who holds such a certificate.

You must be at least 16 years old to qualify for a remote pilot certificate, and you can obtain it in one of two ways:

- You may pass an initial aeronautical knowledge test at an FAA-approved knowledge testing center.
- If you already have a Part 61 pilot certificate, other than a student pilot certificate, you must have completed a flight review in the previous 24 months and you must take a small UAS online training course provided by the FAA.

If you have a non-student pilot Part 61 certificate, you will immediately receive a temporary remote pilot certificate when you apply for a permanent certificate. Other applicants will obtain a temporary remote pilot certificate upon

successful completion of a security background check. We anticipate we will be able to issue temporary certificates within 10 business days after receiving a completed application.

Fact Sheet – Small Unmanned Aircraft Regulations (Part 107) (cont'd) June 21, 2016

UAS Certification

You are responsible for ensuring a drone is safe before flying, but the FAA does not require small UAS to comply with current agency airworthiness standards or obtain aircraft certification. Instead, the remote pilot will simply have to perform a preflight visual and operational check of the small UAS to ensure that safety-pertinent systems are functioning properly. This includes checking the communications link between the control station and the UAS. The UAS must also be registered.

Respecting Privacy

Although the new rule does not specifically deal with privacy issues in the use of drones, and the FAA does not regulate how UAS gather data on people or property, the FAA is acting to address privacy considerations in this area. The FAA strongly encourages all UAS pilots to check local and state laws before gathering information through remote sensing technology or photography.

As part of a privacy education campaign, the agency will provide all drone users with recommended privacy guidelines as part of the UAS registration process and through the FAA's B4UFly mobile app. The FAA also will educate all commercial drone pilots on privacy during their pilot certification process; and will issue new guidance to local and state governments on drone privacy issues. The FAA's effort builds on the privacy "best practices" of the National Telecommunications and Information Administration published last month as the result of a year-long outreach initiative with privacy advocates and industry.

https://www.ntia.doc.gov/files/ntia/publications/voluntary_best_practices_for_uas_privacy_transparency_and_acco_untability_0.pdf

Other Requirements

If you are acting as pilot in command, you have to comply with several other provisions of the rule:

- You must make your drone available to the FAA for inspection or testing on request, and you must provide any associated records required to be kept under the rule.
- You must report to the FAA within 10 days any operation that results in serious injury, loss of consciousness, or property damage (to property other than the UAS) of at least \$500.

Special Provisions for Government Entities

Government entities or organizations (e.g. law enforcement agencies, public universities, state governments, local municipalities) have 2 options for flying UAS:

- 1. Fly under the <u>small UAS rule</u> follow all rules under 14 CFR part 107, including aircraft and pilot requirements; or
- 2. Obtain a blanket public Certificate of Waiver or Authorization (COA) permits nationwide flights in Class G airspace at or below 400 feet, self-certification of the UAS pilot, and the option to obtain emergency COAs (e-COAs) under special circumstances.
